SUMMARY

Bachelor of Information Technology graduate (Cyber Security major) with hands-on fullstack development experience across React, Node.js, SQL, Vue, and JavaScript/HTML/CSS. Founder of NetForgeSols, designing and delivering responsive business websites end-to-end, currently leading development of Travel with Chamru, a full-featured client travel planning web application with React/Node.js/SQL, AI-powered itinerary generation, authentication, and automated notifications. Combines practical software development with a strong security background from penetration-testing coursework, plus business analysis experience gathering requirements and supporting UAT on live ICT projects. Fast learner who enjoys solving problems, writing clean code, and picking up new frameworks quickly.

SKILLS

Languages & Frameworks: React.js | Node.js | JavaScript | Vue.js | HTML | CSS | Python | C++ | SQL (MySQL/PostgreSQL)
Operating Systems & Tools: Linux | Ubuntu | macOS | Windows | Git | GitHub | Trello | Asana
Security & Networking: Burp Suite | OWASP ZAP | Metasploit | Wireshark | Cisco Packet Tracer
Other: Microsoft Word | Excel | PowerPoint

EXPERIENCE

- Founder & Web Developer | NetForgeSols

Jul 2026 - Present, Sri Lanka

 - Founded a startup providing web development and digital solutions for businesses.
 - Design and develop responsive business websites using modern web technologies.
 - Collaborate with clients to gather requirements and transform business ideas into functional web solutions.
 - Build user-friendly interfaces with HTML, CSS, JavaScript, and modern development practices.
 - Manage projects from planning and design through deployment and ongoing support.
 - Continuously explore AI-powered tools and automation technologies to improve business workflows and digital experiences.
- ICT Business Analyst - Trainee | BSS Insight Pty Ltd

Jun 2025 - Present, Melbourne, Australia

 - Completed training and project support activities with the Sri Lankan branch before transferring to the Melbourne office.
 - Assisted in gathering and documenting business requirements from stakeholders.
 - Supported business process analysis and identification of improvement opportunities.
 - Participated in preparing functional and technical documentation for ICT projects.
 - Assisted with system testing, defect reporting, and user acceptance testing activities.
 - Provided support to end users during system implementation and testing phases.
- IT Support - Internship | Gtec-Solution

Aug 2023 - Oct 2023, Melbourne, Australia

 - Collaborated with the IT support team to provide technical assistance to employees and resolve hardware and software issues.
 - Participated in IT projects encompassing hardware upgrades and software installations, ensuring timely deployment using project management tools.
 - Sought guidance from senior IT support staff and embraced feedback for continuous improvement.

PROJECTS

- Travel with Chamru - Sri Lanka Travel Planning Website | Client Project, NetForgeSols

In Progress

Tech stack: React, Node.js, SQL (MySQL/PostgreSQL)

 - Leading development for a client, delivering a responsive, mobile-first travel planning website across 16+ pages (home, itineraries, destinations, packages, gallery, contact, etc.) based on custom UI/UX designs.
 - Building a dynamic "Build Your Own Itinerary" tool allowing users to filter trips by arrival date, traveler count, interests, and budget, with results rendered on an interactive Sri Lanka map.
 - Integrating an AI-powered chatbot trip planner that generates personalized itineraries from natural-language user prompts.
 - Implementing customer/admin authentication, document upload for itinerary attachments, and a downloadable (PDF) itinerary feature.

- Building an automated email notification system triggered on inquiry submission to streamline agent follow-up.
- Developing supporting modules including tour packages, vehicle showcase, guest reviews integration, a live weather widget, and a FAQ/travel info hub.

NetForgeSols Website | netforgesols.com

Jul 2026

- Designed and developed the company website with responsive layouts and modern UI principles.
- Optimised performance and usability across desktop and mobile devices.
- Continuing to expand the platform with new business features.

App Attack - Pentesting Project (Capstone) | Deakin University

- Adopted the perspective of external attackers using automated and manual techniques.
- Conducted penetration testing on OnTrack using Burp Suite and OWASP ZAP, identifying and mitigating critical vulnerabilities.
- Contributed to the project by seeking feedback and maintaining effective communication with team members and project leads.

Web App Development Project (Capstone) | Deakin University

- Collaboratively developed the front-end of a web app for the App Attack project (JavaScript, CSS, HTML, Bootstrap).
- Demonstrated leadership by assigning tasks among colleagues and organising meetings to keep the team on track.
- Used GitHub and Trello to manage tasks, track progress, and facilitate team collaboration.

Responsive Web Project (Individual) | Deakin University

- Built a responsive, dynamic web application using Vue.js, HTML, CSS, and JavaScript, ensuring performance across devices and browsers.

Data Science Concept Project (Individual) | Deakin University

- Constructed a data dictionary and performed data analysis and descriptive analytics.

Property Survey Web Application (Group) | Monash College Diploma, UCL

- Collaboratively developed a web application to survey properties located anywhere in the world (JavaScript, CSS, HTML).
- Used Kraken and Asana as project management tools.

EDUCATION

Bachelor of Information Technology - Cyber Security | Deakin University, Burwood, Australia

2024

Monash College Diploma of Information Technology | Universal College Lanka, Rajagiriya, Sri Lanka

Jan 2022

Monash University Foundation Year | Universal College Lanka, Rajagiriya, Sri Lanka

Oct 2020

- Achieved an overall average of 80.125%, demonstrating strong academic performance.
